

SUPPORTING STUDENT TRANSITION BETWEEN SCHOOLS IN HRCE

This guide explains how to access student information in PowerSchool to support the transition process as students move from one school to another within HRCE.

There are two places where you can find transition planning reports: sqlReports and Print a Student Report. Both types of reports require you to make a selection of students.

SQLREPORTS

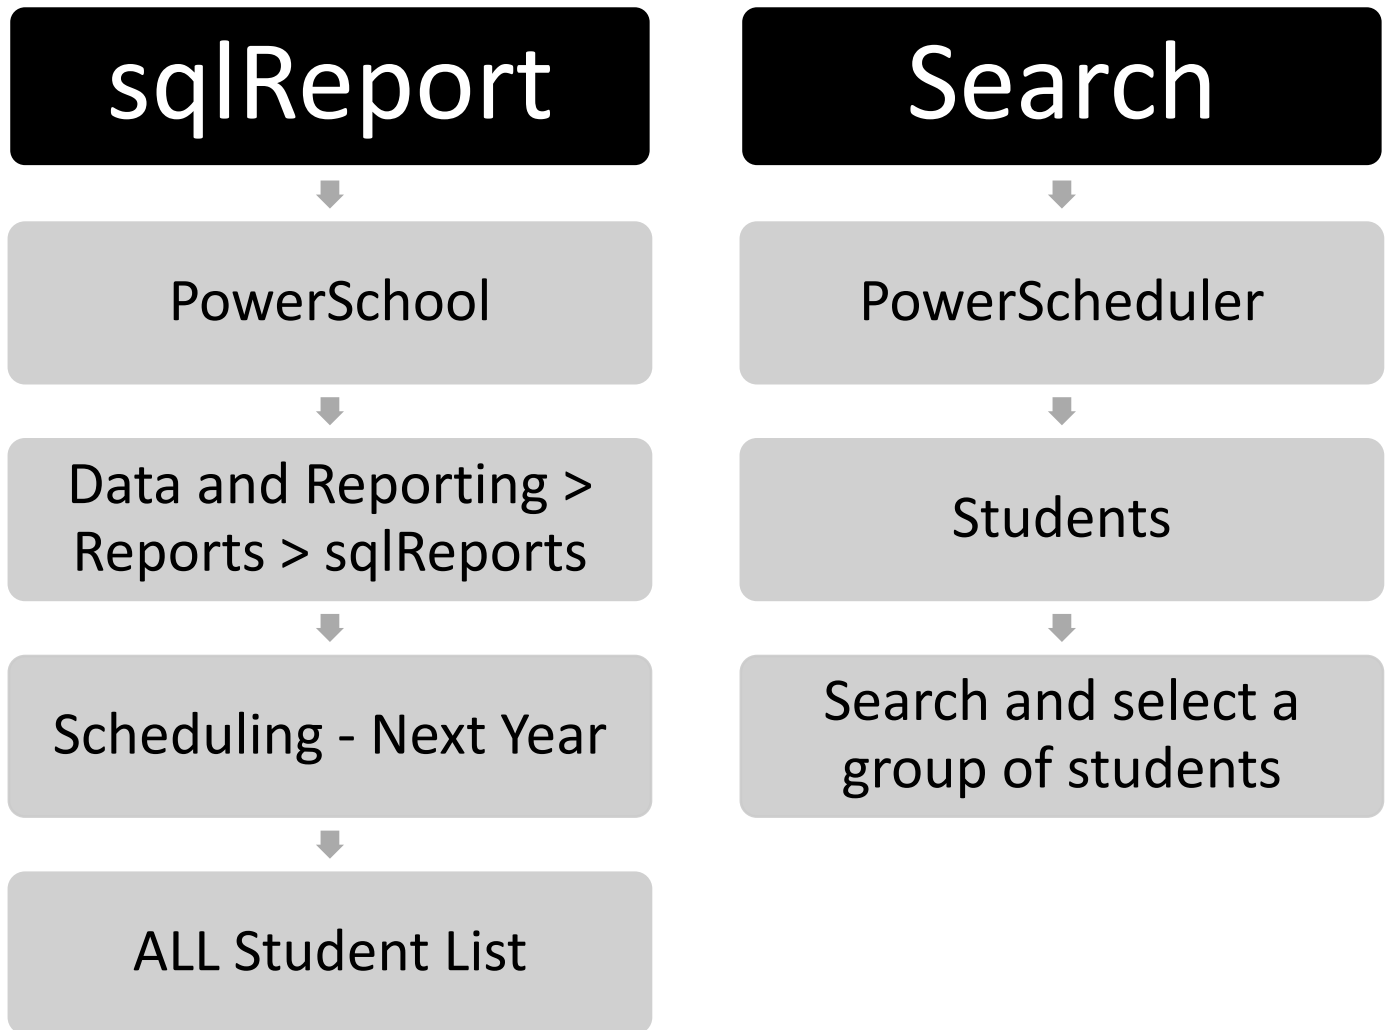

Click Data and Reporting > Reports > sqlReports

Report	Description
Alerts	Identifies students who have information in any of the alert fields and displays the information as a table. Alerts: Other, Guardian, Medical, Discipline
Attendance Summary	Displays aggregated attendance for each student
List Students Scheduled in IPP Courses	Identifies students scheduled for academic IPP courses and lists the courses for each student
Medical Information Table	Identifies students who have medical information in PowerSchool and displays the information as a table
Transition Planning Table	Displays programming, demographic and alert information as a table

MAKE CURRENT STUDENT SELECTION

Here are two ways to list students to make selections:

USEFUL SEARCHES IN POWERSCHEDULER IN THE SPRING SCHEDULING SEASON

Search by	Next Year Grade Level	Next Year Program	Feeder School
Search	sched_nextyeargrade=	sched_nextyearprogram=	enrollment_schoolid=
Example	sched_nextyeargrade=7	sched_nextyearprogram=J005	enrollment_schoolid=###

You can compound any of these searches by entering a semi-colon in between searches. For example:

sched_nextyeargrade=7;sched_nextyearprogram=J005;enrollment_schoolid=600

To obtain a list of schoolid numbers for your feeders, contact your SIS Scheduling Contact.
